

# G-GZ080

## Technical specifications

# GRIP

### Operating mode:

The double-acting cylinder is operated by pneum. compressed-air and actuates the power unit. An eccentric mechanism ensures a long service life and a constant gripping moment. In contrast to the parallel gripper, the gripping safety device is only capable of being closed -GS-.

### Advantages:

- High service life by robust mechanics
- Constant torque over the entire opening and closing range of the fingers
- Mechanical interface according to DIN EN ISO 9409-1
- Low dead weight
- Optional gripping force safety device "shutting"
- Piston position monitoring using inductive proximity switch ZG-RSGU01 / 300-M8
